

AI WITHOUT FEAR

Participant Workbook

Understanding AI without hype, panic or blind trust.

1. My AI Fear Inventory

Complete this at the beginning. There are no wrong answers.

My fear or hope	What evidence do I have?	What would reduce uncertainty?

2. Hallucination Hunt

Ask an AI for factual claims and sources. Verify at least one claim independently.

AI claim	Source used to check	Correct / incorrect / uncertain	What I learned

3. Capability vs. Reliability

For each task, decide what level of human checking is appropriate.

Task	What could go wrong?	What verification is appropriate?
Brainstorming		
Learning a topic		
Work decision		
High-stakes decision		

4. Ethics Laboratory

Scenario: _____

Who benefits?

Who could be harmed?

Who decides?

What safeguards are needed?

Who is accountable?

What information are we missing?

5. The AI Claim Detector

Who is making the claim?

What exactly are they claiming?

What evidence supports it?

What is observed vs. predicted vs. speculative?

What assumptions connect the steps?

What incentives or institutional interests surround the claim?

What would change my mind?

6. My AI Constitution

I will use AI for:

I will verify AI output when:

I will not give an AI unrestricted access to:

When I hear an extreme AI claim, I will ask:

One thing I want to learn about AI is:

Learn. Test. Verify. Decide.
